SUMMARY

Full-Stack Engineer with a production track record of building and shipping AI-powered, cloud-native SaaS products end-to-end — from architecture to deployment. Delivered a live CRM that captured 130+ leads using LLM-driven scoring and a Chrome Extension with zero paid APIs. Skilled in MERN, Next.js 14, FastAPI, and AWS infrastructure, with deep focus on system performance, scalable design, and AI integration. Ships fast, iterates smarter, and writes code that works in production — not just locally.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C/C++, SQL, R

Frontend: React.js, Next.js 14, Redux, TailwindCSS, ShadCN UI, Framer Motion, HTML5, CSS3

Backend: Node.js, Express.js, FastAPI, REST API Design, JWT Auth, WebSockets, Multithreading

Databases: PostgreSQL, MySQL, MongoDB, Supabase, Firebase (Firestore)

Cloud & AI: AWS (EC2, S3, Lambda, IAM, VPC, CloudWatch), OpenAI API, OpenRouter, LLM Integration, Prompt Engineering

DevOps & Tools: Git, GitHub Actions, Docker, CI/CD Pipelines, Vercel, Render, Postman, Figma

Core Concepts: System Design, DSA, OOP, Agile/Scrum, Cloud Security, Scalable Architecture

PROFESSIONAL EXPERIENCE

Full-Stack Developer — GoTeeOff (Web3 Client)

2026 – Present | Remote

- Architected and shipped an end-to-end AI-powered lead generation CRM — eliminating \$100/month in third-party scraping costs — using a Chrome Extension, FastAPI, Supabase, and OpenRouter LLM pipelines; system captured **130+ qualified leads** live in production.
- Built a real-time Next.js 14 dashboard with WebSocket live feed, Recharts analytics, and outreach history tracking — deployed across Vercel, Render, and Supabase with zero downtime.
- Engineered an LLM-based lead scoring engine (0–100 relevance score via Mistral) that auto-generates personalized outreach messages from LinkedIn profile context, reducing manual outreach effort by **~70%**.

Software Developer Intern — Sparks to Ideas

2023 | Ahmedabad, India

- Delivered production-ready React components and re-engineered Redux state management flows, resulting in measurable improvement in render performance and data throughput on the live client platform.

PROJECTS

DPI — Deep Packet Inspector 🔗

Java · Node.js · Express.js · React.js · TailwindCSS · Multithreading · AI Layer

- Built a full-stack Deep Packet Inspection engine that parses PCAP files, classifies network traffic at the application layer, and pipes output through an AI layer — producing executive-ready analyst summaries for cybersecurity and network observability use cases.
- Slashed processing latency from **60s to under 3s** (95% reduction) by redesigning the multi-threaded worker lifecycle with max-packet controls and optimized thread shutdown — making real-time inspection viable.
- Shipped a React.js dashboard with live flow statistics, an AI insights panel, and one-click downloadable audit reports.

ContentForge — AI Marketing Content Platform 🔗

Next.js · OpenRouter AI · TailwindCSS · REST API · Prompt Engineering · Vercel

- Engineered a full-stack AI platform that converts a single campaign brief into publish-ready copy across **7 platforms** (Instagram, LinkedIn, Email, etc) — cutting content drafting time by **~60%** for non-technical marketing teams.
- Implemented tone-based rewriting, A/B variant generation, and audience targeting via structured prompt engineering — fully deployed on Vercel with a clean, marketer-first UI.

AI-Powered Lead Generation CRM (GoTeeOff — Client Project)

Next.js 14 · TypeScript · FastAPI · PostgreSQL · Supabase · OpenRouter · Chrome Extension API · Framer Motion

- Replaced \$100/month scraping subscriptions by building a bespoke AI CRM from zero — a silent Chrome Extension captures LinkedIn leads as you browse with no blocked requests and no paid API dependency.
- Each lead is scored 0–100 by an LLM (Mistral via OpenRouter) and paired with a one-click AI-generated personalized outreach message — **130+ leads captured**, system running live in production.

EDUCATION

B.Tech, Computer Science Engineering — Karnavati University, Ahmedabad

2024 – Present

Diploma, Information Technology — LJ University, Ahmedabad

2021 – 2024 | CGPA: 7.50/10

Secondary Education (SSC) — Nelson's High School

2019 | 85.11%

CERTIFICATIONS

AWS Academy Graduate — Cloud Security Foundations

2026

AWS Academy Graduate — Cloud Foundations
